STATE OF CALIFORNIA STATE WATER RESOURCES CONTROL BOARD

DIVISION OF WATER RIGHTS

ORDER

APPLICATION	29181	PERMIT	20347	LICENSE

ORDER APPROVING A NEW DEVELOPMENT SCHEDULE

WHEREAS:

- 1. Permit 20347 was issued to D-Y Ranch on July 14, 1989 pursuant to Application 29181.
- 2. A petition for an extension of time within which to develop the project and apply the water to the proposed use has been filed with the State Water Resources Control Board (Board).
- The permittee has proceeded with diligence and good cause has been shown for said extension of time.

NOW, THEREFORE, IT IS ORDERED THAT:

1. Condition 8 of the permit be amended to read:

CONSTRUCTION WORK SHALL BE COMPLETED ON OR BEFORE

December 31, 1993

(0000008)

2. Condition 9 of the permit be amended to read:

COMPLETE APPLICATION OF THE WATER TO THE PROPOSED USE SHALL BE MADE ON OR BEFORE

December 31, 1995 (0000009)

FEBRUARY 2 5 1992

Edward C.

Dated:

Edward C. Anton, Chief Division of Water Rights

STATE WATER RESOURCES CONTROL BOARD DIVISION OF WATER RIGHTS

PERMIT FOR DIVERSION AND USE OF WATER

PERMIT 20347

Application 29181	of D-Y Ranch, c	/o Ray York							
10331 York Road, Mon	tague, CA 96064								
filed on January 29, 1 Board SUBJECT TO VESTE						Resource	es Control		
Permittee is hereby authori	zed to divert and use water a	s follows:							
1. Source:	Tributary to:								
(1) Willow Creek	Klamath River								
(2) Unnamed Stream	Willow Creek thence								
	Klamath River

APPLICATION 29181

5. The water appropriated shall be limited to the quantity which can be beneficially used and shall not exceed 49 acre-feet per annum to be collected from November 1 of each year to April 1 of the succeeding year.

(0000005)

This permit does not authorize collection of water to storage outside of the specified season to offset evaporation and seepage losses or for any other purpose.

(0000051)

The maximum rate of diversion to offstream storage shall not exceed 1.25 cubic feet per second.

(000005J)

6. The amount authorized for appropriation may be reduced in the license if investigation warrants.

(0000006)

7. Construction work shall begin within two years of the date of this permit and shall thereafter be prosecuted with reasonable diligence, and if not so commenced and prosecuted, this permit may be revoked.

(0000007)

8. Construction work shall be completed by December 31, 1991.

(800000)

9. Complete application of the water to the authorized use shall be made by December 31, 1992.

(0000009)

10. Progress reports shall be submitted promptly by permittee when requested by the State Water Resources Control Board until license is issued.

(0000010)

11. Permittee shall allow representatives of the State Water Resources Control Board and other parties, as may be authorized from time to time by said Board, reasonable access to project works to determine compliance with the terms of this permit. (00

(0000011)

12. Pursuant to California Water Code Sections 100 and 275, and the common law public trust doctrine, all rights and privileges under this permit and under any license issued pursuant thereto, including method of diversion, method of use, and quantity of water diverted, are subject to the continuing authority of the State Water Resources Control Board in accordance with law and in the interest of the public welfare to protect public trust uses and to prevent waste, unreasonable use, unreasonable method of use or unreasonable method of diversion of said water.

The continuing authority of the Board may be exercised by imposing specific requirements over and above those contained in this permit with a view to eliminating waste of water and to meeting the reasonable water requirements of permittee without unreasonable draft on the source. Permittee may be required to implement a water conservation plan, features of which may include but not necessarily be limited to: (1) reusing or reclaiming the water allocated; (2) using water reclaimed by another entity instead of all or part of the water allocated; (3) restricting diversions so as to eliminate agricultural tailwater or to reduce return flow; (4) suppressing evaporation losses from water surfaces; (5) controlling phreatophytic growth; and (6) installing, maintaining, and operating efficient water measuring devices to assure compliance with the quantity limitations of this permit and to determine accurately water use as against reasonable water requirements for the authorized project. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such specific requirements are physically and financially feasible and are appropriate to the particular situation.

The continuing authority of the Board also may be exercised by imposing further limitations on the diversion and use of water by the permittee in order to protect public trust uses. No action will be taken pursuant to this paragraph unless the Board determines, after notice to affected parties and opportunity for hearing, that such action is consistent with California Constitution Article X, Section 2; is consistent with the public interest and is necessary to preserve or restore the uses protected by the public trust.

(0000012)

13. The quantity of water diverted under this permit and under any license issued pursuant thereto is subject to modification by the State Water Resources Control Board if, after notice to the permittee and an opportunity for hearing, the Board finds that such modification is necessary to meet water quality objectives in water quality control plans which have been or hereafter may be established or modified pursuant to Division 7 of the Water Code. No action will be taken pursuant to this paragraph unless the Board finds that (1) adequate waste discharge requirements have been prescribed and are in effect with respect to all waste discharges which have any substantial effect upon water quality in the area involved, and (2) the water quality objectives cannot (0000013)be achieved solely through the control of waste discharges.

This permit shall not be construed as conferring upon the permittee right of access to the point of diversion.

(0000022)

(0050043)

- 15. Permittee shall install and maintain an outlet pipe of adequate capacity in the dam as near as practicable to the bottom of the natural stream channel in order that water entering the reservoir which is not authorized for appropriation under this permit may be released. Before starting construction, permittee shall submit plans and specifications of the outlet pipe to the Chief of the Division of Water Rights for approval. Before storing water in the reservoir, permittee shall furnish evidence which substantiates that an outlet pipe has been installed in the dam. Evidence shall include photographs showing completed works or certification by a registered Civil or Agricultural Engineer.
- Measuring Device Offstream Storage:(special term) No water shall be diverted from Willow Creek to offstream storage under this permit until:
 - a) Permittee has established a measuring station at site 1,320 feet South, 825 feet East from NW corner of Section 21, T46N, R5W of MDB&M, and installed a device satisfactory to the State Water Resources Control Board for measuring bypass flows in the Willow Creek; and
 - b) For the protection of prior rights, permittee bypasses 1 cfs or all streamflow if it is less than 1 cfs.

Permittee shall be responsible for all costs of installation and maintenance of the said measuring device.

(0360800) (0160800)

17. Permittee shall install and properly maintain in the reservoir a staff gage, satisfactory to the State Water Resources Control Board, for the purpose of determining water levels in the reservoir.

Permittee shall record the staff gage reading on or about November 1 of each year. Such readings shall be supplied to the State Water Resources Control Board with the next progress report submitted to the Board by permittee.

Permittee shall allow the watermaster or a designated representative of Willow Creek Ranch Partnership reasonable access to the reservoir for the purpose of verifying staff gage readings and determining water levels in the reservoir.

(0070047) (0100047)

(0590800)

- In the event of shortage of water from March 1 to April 1, the watermaster for Willow Creek Reference has the authority to regulate diversions under Application 29181, if in his opinion, such diversion would be adverse to the diversion at Willow Creek Diversion Points 5 and 6 as described in the Willow Creek adjudication, Superior Court, Siskiyou County, No. 24482.
- 19. Permittee shall install and maintain a control device satisfactory to the State Water Resources Control Board to regulate water diversion from Willow Creek during the diversion season authorized by this permit and to lock and seal the diversion point at all times outside the authorized diversion season. (0550900)

20. Rights under this permit are and shall be subject to existing right of Cyril, June, and Robert Cook and their successors in interest as determined by Willow Creek adjudication, Superior Court, Siskiyou County, No. 24482, insofar as said adjudication rights are maintained.

(000T001)

21. In order to prevent degradation of the quality of water during and after construction of the project, prior to commencement of construction permittee shall file a report pursuant to Water Code Section 13260 and shall comply with all waste discharge requirements imposed by the California Regional Water Quality Control Board, North Coast Region, or by the State Water Resources Control Board.

(0000100)

This permit is issued and permittee takes it subject to the following provisions of the Water Code:

Section 1390. A permit shall be effective for such time as the water actually appropriated under it is used for a useful and beneficial purpose in conformity with this division (of the Water Code), but no longer.

Section 1391. Every permit shall include the enumeration of conditions therein which in substance shall include all of the provisions of this article and the statement that any appropriator of water to whom a permit is issued takes it subject to the conditions therein expressed.

Section 1392. Every permittee, if he accepts a permit, does so under the conditions precedent that no value whatsoever in excess of the actual amount paid to the State therefor shall at any time be assigned to or claimed for any permit granted or issued under the provisions of this division (of the Water Code), or for any rights granted or acquired under the provisions of this division (of the Water Code), in respect to the regulation by any competent public authority of the services or the price of the services to be rendered by any permittee or by the holder of any rights granted or acquired under the provisions of this division (of the Water Code) or in respect to any valuation for purposes of sale to or purchase, whether through condemnation proceedings or otherwise, by the State or any city, city and county, municipal water district, irrigation district, lighting district, or any political subdivision of the State, of the rights and property of any permittee, or the possessor of any rights granted, issued, or acquired under the provisions of this division (of the Water Code).
